

Explainability Report

We report the following SageMaker analysis.

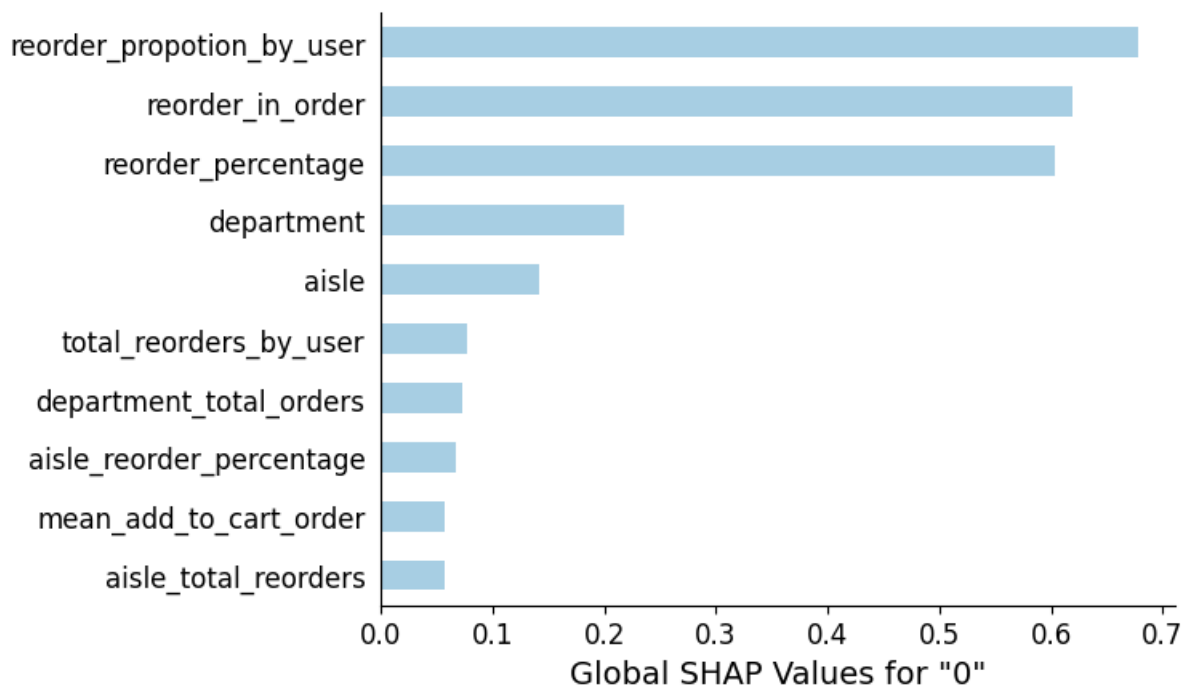

Explanations for all labels

The Model has 60 input features and 2 output labels. We computed KernelShap on the dataset and display the 10 features with the greatest feature attribution summed up over all the labels.

Explanations for "0"

The Model has 60 input features. We computed KernelShap on the dataset dataset and display the 10 features with the greatest feature attribution.

Explanations for "1"

The Model has 60 input features. We computed KernelShap on the dataset `dataset` and display the 10 features with the greatest feature attribution.
